

WESTERN AUSTRALIA'S LEADING VINYL-WRAP DOOR MANUFACTURER

## World Class Gluing System

EXCEEDING VINYL-WRAP EXPECTATIONS FOR OVER 15 YEARS.

Modernform Doors has attained Western Australia's first and only world-class gluing system which acts as an impervious membrane to the back of our PVC vinyl.

Now exceeding the strength and longevity of paint & lacquer, Modernform hold no record of de-laminated products for over 15 years.

This thermo-fusion process eliminates the increase of moisture within our MDF board which would usually cause fibre-swelling. Therefore our end product results in a much smoother, hygienic finish for years to come.

Modernform Doors is currently the only manufacturer of vinyl-wrap doors using the thermo-fusion system in Australia since 2002. The process is undertaken in-house with full control. Our aim is to save industry production time and address health issues associated with current spray systems still used today.

# Who we are

Modernform Doors is a West Australian family owned and operated business providing quality kitchen, bathroom, laundry, bedroom and outdoor vinyl finishes matching any customer requirements.

We have been assisting the cabinet making industry for over 15 years and now encourage home renovators, carpenters, builders and interior designers to view our range as we expand our services yearly.

We differentiate ourselves from any other vinyl-door suppliers across WA with the use of extensive software and technology from the most renowned machinery companies around the world.

Our vinyl products set the bar for Australian vinyl-door manufacturing with examples currently being used in commercial projects such as Crown Towers & Casino, Television & other beautiful projects around the world. Over 100 diverse door profiles now exist at Modernform Doors with a large range of colours and finishes to suit.

Vinyl-wrap doors are also versatile, practical and economical, giving our customers the freedom to design their own home. They also have an array of excellent properties, including moisture resistance and strength, making it the perfect material for your doors, panels & drawers in the years to come.

Our vinyl-doors are made from a high quality, 18mm moisture resistant MDF material. MDF boards are environmentally friendly and are vacuum-sealed preventing any moisture penetrating the surface and eliminating the possibility of chipped edges.

With dedicated staff through all steps of production, Modernform Doors ensure the highest quality and carry a seven year guarantee as of 2010 against faulty workmanship (conditions apply).

Our mission is to grow Western Australia's building industry by generating top quality products in-house and with the implementation of new products and services ever year, assist workplaces in saving money, time and man-power.

Each door design has a standard face and edge profile, however all door designs can be mixed with different edge moulds and colours giving you many more choices.

## Category 4 - Aluminium Edges

4mm front aluminium edges can be used with any vinyl colour or centre profile of your choice. This will result in a door with a slimline edge that grants the luxury or commercial feel in various applications. Modernform's aluminium finishes are used in many alfrescos, kitchens, bars and wardrobes.

## Finger Grips

A handleless kitchen is almost the go to for attaining a 'modern' look in any persons home. There's something about the clean and effortless look of a handleless kitchen that home owners seem to love, especially in many contemporary kitchens. Cabinet makers can easily apply this feature to your desired work.

## Frames

Frame doors in a kitchen, bathroom or laundry are perfect for keeping ornaments and items on display for guests and family around the home whilst keeping everything safe inside that cabinet, protected from dust and children.

In most homes, glass doors and cabinets look best when mounted on walls while solid modules are often preferred for the bottom area.

Glass doors also assist in illuminating one's dining room, welcoming guests on its own.

We specialise in single cut out frames and a 4-holed option. Upon request we can implement an in-house rebate for glass to be applied by your cabinet maker.

## Wine Racks

Our wine racks allow you to store wine in a neat and stylish way.

We can apply almost every vinyl finish we have and manufacture a winerack to suit the rest of your vinyl wrapped kitchen.

They can be installed to not only kitchens, but also bars, dining rooms and outdoor alfrescos as to which we can also cater for.

Our wine racks can have bottle cut-outs either square or circular depending on your choice.

## Shelves

Corner shelves are available and can be manufactured with any angle or radius. Supplied measurements are recommended.

Radius

Angled

## Bar Panels

Bar panels can be made with two or more profiles or patterns separated with a mid rail as standard.

Most bar panels are made with a square or arch profile which can add a unique design to not only a bar, but also to a kitchen or buffet display.

For further queries we highly recommend contacting our office.

## Pantry Doors

Pantry doors can be manufactured with two or four profile patterns and double mid rails which are centered is standard. The lower profile can be sized to match the same height as the neighbouring doors in your kitchen.

We advise you contact us directly to match your neighbouring door heights. Pantry doors can also be adjusted when running to the ground floor to match kickboard heights so that profiles are aligned.

We offer to match any existing profiles on any pantry door but do recommend our square, arch and double arch profiles.

## Drawers

Drawer banks can be made into two different designs. They can be manufactured as a single drawer design which is a singular panel then cut into desired sizes.

The other common option is the individual design where each drawer itself obtains a full pattern from our door profiles. Individual design drawers have the option of half rails or full rails between each drawer.

Contacting our office for your desired individual drawer design is preferred as most styles have a minimum size allowance.

Individual Design

## Wrap-Around Panels

Introduced in January 2010, wrap-around panels have been a great success with seamless joins as they fold. These panels can be used in many types of applications i.e. island benches, fridge panels, end panels and open boxes. Wrap-around panels are an outstanding way to give your kitchen that extra touch of elegance.

*Over 20 years of precise, world-class manufacturing...*

# Custom Door Designs

## Custom-Matching Existing Profiles

With state of the art machinery & software from around the world we are able to match almost every existing door design. Our CNC technology attains the capability of cutting to many depths and steps of a door profile. We highly encourage customers to bring forward a design with our staff to confirm manufacturing possibilities.

## 25mm & 32mm MDF Doors

MDF board can be used for a wide range of applications. We also grant the option of 25 & 32mm panels which can be vinyl-wrapped and used where required.

Example applications include sliding doors, walk-in robes & internal house doors.

Our door designs & colours are applicable to both 25 & 32mm doors.

## Fluted Cabinet Mouldings

Fluted mouldings are available to fit any home applications' overall purpose & style.

Flutes are predominantly suited for kitchen applications and add a touch of elegance. We go out of our way to accentuate your cabinet areas and create focal points in your home.

Fluting refers three or more shallow vertical grooves on the face of the molding reminiscent of Greek & Roman column architecture. Flute mouldings have the possibility of matching dining tables & columns around your home.

## Double-Sided Panels

Our vinyl has the possibility of being applied to BOTH sides of an MDF panel. A door completely wrapped allows your home applications to shine without the worry of a chipped back-edge. This allows your cabinetry to be showcased both externally and internally.

## Cornice Moulds

Our MDF cornice moulds provide simple and effective ways to alter the aesthetic appearance of your kitchen, laundry or bathroom. Our moulds can be vinyl wrapped with any finish of your choice or simply kept raw for your cabinet maker to paint or varnish.

All moulds add a different style to the kitchen, acting as a major difference between a modern or 'old french' look. They can be applied to the top of your cabinetry to suit further plaster-cornice moulds surrounding your ceiling.

# DOOR CARE & MAINTENANCE GUIDE

## Everyday Cleaning

All doors are easily cleaned using a soft-damp cloth. If a stain develops, use a soapy water or Windex. Using a dry cloth afterward is recommended to prevent streaks.

## Stubborn Stains

If a stain persists, try methylated spirits and use a soft brush (i.e. soft tooth brush). A very mild abrasive such as toothpaste can additionally be used to remove stains.

NOTE: The use of such abrasive cleaners is a last resort, as such methods can prematurely wear away the surface of the doors.

DO NOT: use strong Alkaline or Acidic cleaners such as CLR, Harpic Toilet Duck, Draino, Bleach, Domestos or Sugar Soap. Never use rough abrasive cleaners such as Sand Paper, Steel Wool, Creme Cleaners and Dry Powders. Additionally, never use wax-based products such as Mr Sheen as it can potentially leave a thin wax film on the door surface.

## Door Care & Installation

Vinyl doors are not to be exposed to direct sun, steam, prolonged humidity or heat appliances. Ovens, gas stove-tops and induction hotplates can all potentially damage doors when exposed to the heat they produce. Overheads must be at a minimum of 700mm above these appliances.

Rangehoods must be in use on a high level at all times, filters regularly cleaned and full external flutes installed correctly. All heat radiated products and appliances must not be used directly under overhead doors and panels.

EXTRA CAUTION WITH INDUCTION HOT PLATE AND WOK BURNERS, UNITS PRODUCE EXTREME HEAT

All our vinyl-wrap doors meet current ATLA and European standard for heat resistance (UNI9242) to withstand 70C for 4 hours. Heat above this can force the vinyl to shrink back from the door or panel.

Most ovens do not have a baffle-fitted surrounding found on the oven door and the excessive heat from oven doors can cause the vinyl to shrink back. Heat deflector strips are recommended around oven doors as to which we can supply but do not install.

FAILURE TO FOLLOW THESE PROCEDURES WILL VOID YOUR WARRANTY

# Warranty

## Seven year limited warranty (Proof of Purchase)

Modernform Doors warrants that, under normal use and service, Modernform products shall be free from defects in workmanship and manufacture for the period of seven (7) years from the date of sale to the consumer purchaser.

In the event that the products do not perform as warranted, the consumer purchaser's sole remedy shall be limited to repair or replacement, at manufacturers discretion, of all or any part of the product which is defective with a comparable product at that time, and was purchased by the original consumer purchaser.

This warranty shall not apply to any defects or damages arising from any of the following:

1. Accidents, Abuse or Misuse
2. Exposure to extreme temperatures. (e.g. Flush mount wall ovens: heat deflectors to be installed. Overheads too low to cook top, direct sun, steam, prolonged humidity or heat appliances).
3. Improper installation or Fabrication
4. Improper maintenance
5. Alteration or repair by anyone not authorised by Modernform Doors.
6. Owner must provide proof of purchase or warranty is void.
7. Warranty only applies to replacement of doors. (DOES NOT include labour costs for installations.)
8. If colour is discontinued, replacement will match as close as possible and this will only apply to affected doors/panels.

To the maximum extent permitted by law, including the Trade Practice Act 1974 (TPA) and / or similar state or territory laws:

- A: No other warranties, express or implied, are made, including merchantability, fitness for the particular purchase, discolouration over time; and
- B: Under any circumstances shall Modernform Doors be liable for any loss or damage arising from the purchase, use, or inability to use this product, or for any special, indirect, incidental, or consequential damages.

N.B. WARRANTY NON-TRANSFERABLE
